SUMMARY

Software Engineering undergraduate at SLIIT and a free and open-source developer passionate about building technology that solves real-world problems. Skilled in full-stack development with Node.js, React, Next.js, and Spring Boot, building scalable web applications and transforming ideas into practical products. I believe software should be open, useful, accessible, and create a positive impact, and I work to build it that way.

EDUCATION

B.Sc (Hons) in Software Engineering

Malabe, Sri Lanka

Sri Lanka Institute of Information Technology

Oct. 2024 – Present

Relevant Modules: DSA, Database Design, Object-Oriented Analysis, Computer Networks, OS & System Admin

G.C.E Advanced Level (Commerce Stream)

Kurunegala, Sri Lanka

Wayamba Royal College

Jan. 2019 – Dec. 2021

EXPERIENCE

Co-Founder

Jun 2023 – Present

Elephant Journey

Remote, Sri Lanka

- elephantjourney.info | [Download](#)
- Joined with my two friends during school days to build a community-driven mobile app addressing human-elephant conflict in Sri Lanka
- The platform has reached **15,000+** downloads across iOS and Android
- Designed the complete UI/UX of the mobile app from scratch using Figma, creating wireframes, high-fidelity prototypes, and a cohesive design language for the product
- Maintained the public-facing website using Next.js
- Developed internal tools for regional alert management and data analytics for the operations team

PROJECTS

OpenATS | *Next.js, Express.js, PostgreSQL, WSO2 Identity Platform, BullMQ*

Feb 2026 – Present

- github.com/chamals3n4/OpenATS | demo.openats.dev (Live Demo)
- Built a self-hosted, open-source Applicant Tracking System using a layered monolithic architecture with a REST API backend and Postgres database managed via Drizzle ORM
- Integrated the WSO2 Identity Platform as the identity management layer and used the official SCIM 2.0 API for user provisioning inside the application
- Implemented event-driven CV analysis using BullMQ job queues with the Gemini API, decoupling resume parsing from the main request flow for asynchronous background processing

OPD Queue | *Java 21, Spring Boot, PostgreSQL, WebSocket, Thymeleaf*

June 2026

- github.com/chamals3n4/opdqueue
- Built a real-time OPD queue management system for hospitals with priority-based and FIFO queue strategies
- Implemented live queue updates using WebSockets with observer pattern for display boards and patient notifications
- Designed a PDF slip generation system with QR codes for patient queue tickets
- Used core OOP concepts and design patterns to build the system

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Ballerina, SQL

Backend & APIs: Node.js (Express.js), Ballerina, Spring Boot

Frontend: React, Next.js, Tailwind CSS, MUI

Developer Tools: Git, Linux, Docker, GitHub Actions, Vercel, Cloudflare Workers

CERTIFICATIONS

WSO2 Certified Identity Server Developer - V7 – [Credential](#)

Top 10 Finalist – Innovate with Ballerina 2025 – [View Certificate](#)

SLASSCOM Ingenuity Awards 2024 – [Credential](#)

Finalist, CodeX - CodeJam by CSE 2025, University of Moratuwa – [Credential](#)

Top 20 Teams, Designathon – University of Sri Jayewardenepura – [Credential](#)

ACHIEVEMENTS

Top 10 Finalist & Most Popular Innovation, Innovate with Ballerina 2025 – for Nomad Page, a platform helping digital nomads plan their work-life in Sri Lanka, organized by IEEE Student Branch UoM and WSO2 – [Details](#)

Winner, SLASSCOM Ingenuity Awards 2024 – School Category for Elephant Journey, recognized for a mobile-based solution reducing human-elephant conflict through real-time community reporting – [Details](#)

Top 50 Finalist, Dialog Innovation Challenge 2024 – selected from 1,000+ applicants nationally for Elephant Journey's approach to incident tracking and route alerts – [Details](#)
