Summary

Full-stack developer focused on building open-source software that solves real-world problems. I enjoy turning ideas into practical, scalable products and shipping them end to end. I believe software should be open, useful, and impactful, and I build it that way.

Education

B.Sc (Hons) in Software Engineering — Malabe, Sri Lanka
Sri Lanka Institute of Information Technology — *Oct. 2024 – Present*
Relevant Modules: DSA, Database Design, Object-Oriented Analysis, Computer Networks, OS & System Admin

G.C.E Advanced Level (Commerce Stream) — Kurunegala, Sri Lanka
Wayamba Royal College — *Jan. 2019 – Dec. 2021*

Projects

OpenATS | *Next.js, Express.js, PostgreSQL, WSO2 Identity Platform, BullMQ* — Feb 2026 – Present

- github.com/chamals3n4/OpenATS | openats.dev
- Built a self-hosted, open-source Hiring Platform using a modular monolithic architecture with a REST API backend and Postgres database managed via Drizzle ORM
- Integrated the WSO2 Identity Platform as the identity management Layer and used the SCIM2 API for user provisioning inside the application
- Implemented event-driven CV analysis using BullMQ job queues, decoupling resume parsing from the main request flow for asynchronous background processing

OpenSchool | *Go(Gin), PostgreSQL, ThunderID, React, Carbon Design System* — June 2026 – Present

- github.com/openschool-org/openschool
- Building an open-source school digitization platform with a Go/Gin backend using sqlc and pgx for type-safe database access
- Integrated ThunderID IdP for authentication and access control, with a React frontend built on the Carbon Design System

Elephant Journey | *Firebase Functions, Express.js, Figma, Rive, Next.js* — Jun 2023 – Jun 2026

- Play Store URL
- Co-founded and launched a community-driven mobile app to address human-elephant conflict in Sri Lanka, reaching **15,000+** downloads across iOS and Android
- Designed the complete UI/UX of the mobile app using Figma and implemented backend services using Firebase Functions
- Built a custom CMS using Next.js and developed internal tools for regional alerts and data analytics

OPD Queue | *Java 21, Spring Boot, PostgreSQL, WebSocket, Thymeleaf* — June 2026

- github.com/chamals3n4/opd-queue
- Built a real-time OPD queue management system for hospitals with live display boards and a patient-facing QR status page showing queue position and estimated wait time
- Implemented instant queue updates using STOMP WebSockets, pushing live state to both the admin panel and patient-facing pages with no refresh
- Built PDF ticket slip generation with QR codes using iText7 and ZXing

Technical Skills

Languages: JavaScript, Go, TypeScript, Java, Ballerina, SQL
Backend & APIs: Node.js (Express.js), Gin, Ballerina, Spring Boot
Frontend: React, Next.js, Tailwind CSS, MUI, Base UI, shadcn/ui
Developer Tools: Git, Linux, Docker, GitHub Actions, Vercel, Cloudflare Workers
WSO2 Products: Identity Platform, ThunderID, Developer Platform, Devant

Certifications

WSO2 Certified Identity Server Developer - V7 – Credential

Top 10 Finalist – Innovate with Ballerina 2025 – View Certificate

SLASSCOM Ingenuity Awards 2024 – Credential

Finalist, CodeX - CodeJam by CSE 2025, University of Moratuwa – Credential

Top 20 Teams, Designathon – University of Sri Jayewardenepura – Credential

Achievements

2nd Runner-up, DevQuest – CodeFest 2026 – Organized by SLIIT in partnership with 99x, competing as a team of three – Details

Winner, CodeJam 2026 – SLIIT – Won the annual CodeJam competition organized by the Software Engineering Student Community (SESC) of SLIIT as a member of Team Octopipers – Details

Winner, SLASSCOM Ingenuity Awards 2024 – School Category for Elephant Journey, recognized for a mobile-based solution reducing human-elephant conflict through real-time community reporting – Details

Top 50 Finalist, Dialog Innovation Challenge 2024 – selected from 1,000+ applicants nationally for Elephant Journey's approach to incident tracking and route alerts – Details

Top 10 Finalist & Most Popular Innovation, Innovate with Ballerina 2025 – for Nomad Page, a platform helping digital nomads plan their work-life in Sri Lanka, organized by IEEE Student Branch UoM and WSO2 – Details
